## Selected Work and Research Experience

### Department of Biological Sciences, University of New Hampshire

PHD STUDENT

Durham, NH

2022 - Present

- Quantifying the impacts of heatwaves on marine invertebrate populations using an exposure magnitude-duration framework

### NOAA Fisheries

KNAUSS MARINE POLICY FELLOW

Silver Spring, MD

2021-2022

- I worked with the Office of the Assistant Administrator for Fisheries on high-level science management and policy. I worked on improving the NOAA institutional repository, wrote fisheries survey communications materials, and create a bibliometric analysis of NOAA Fisheries publications. I supported NOAA Arctic policy by working on incorporating indigenous traditional ecological knowledge into the US position in a multilateral agreement.

### Department of Environmental Conservation, University of Massachusetts Amherst

MASTER'S STUDENT

Amherst, MA

2018-2020

- I conducted research on the growth and survival of locally adapted populations of the Oyster Drill (*Urosalpinx cinerea*) collected from sites along the latitudinal gradient on the Pacific and Atlantic coasts of the US. I mentored an undergraduate research intern and their independent project as part of the Five College Coastal and Marine Science program. I was a teaching assistant for Marine Ecology and Introduction to Ecology.

## Hurricane Island Foundation

RESEARCH ASSISTANT

Rockland, ME

2018

- I assisted growth rate research on bottom culture and ear-hung scallop aquaculture in the Gulf of Maine. Operated outboard motorboats in variable coastal conditions. I mentored two students from the Women of the Sea Program on their independent research projects.

## Operation Wallacea

AQUATIC ECOLOGIST

Rosalie, Dominica

2017

- Directed field season research for long-term stream monitoring project using macroinvertebrate biotic indices and tracked migration patterns of a freshwater snail. One published paper as product. I instructed high school students in field ecology methodology and directed data collection for both projects.

## Smithsonian National Zoo

CONSERVATION INTERN

Washington, DC

2017

- I performed animal husbandry of threatened and endangered herpetofauna, and collected behavioral data of amphibians within exhibits

## Smithsonian National Museum of Natural History

REEF BIODIVERSITY TECHNICIAN

Washington, DC

2016

- Analyzed images and data on reef organism growth under ocean acidification conditions. Field processed photographic and genetic samples from settlement places on an expedition in Curaçao. I participated in two submersible dives to collect settlement plates.

## The Wilderness Society

WILDERNESS TECHNICIAN

San Francisco, CA

2016

- I completed a wilderness area assessment of Stanislaus and Eldorado National Forests using GPS tablets and ArcGIS. Performed tasks independently in remote mountain areas. I recommended the outlines of a new wilderness area based on observed human impacts and natural features.

## Bowdoin Science Station

KENT ISLAND FELLOW

Kent Island, NB, Canada

2014

- I designed and collected data on the effects of current strength on intertidal invertebrate biodiversity.

## Darling Marine Station, University of Maine

MARINE SCIENCE INTERN

Walpole, ME

2013

- I analyzed benthic images from the Drake Passage of species diversity focusing on corals with a master's student.

## Cape Eleuthera Institute

LIONFISH AND AQUACULTURE INTERN

Deep Creek, The Bahamas

2012

- I maintained open ocean aquaculture cage with juvenile Cobia, involved daily SCUBA diving. I conducted patch reef surveys of fish diversity and lionfish morphological data. REEF fish surveyor certified.
